Overall Learner Objective:

The overall learner objective for this series is to discuss best practices for clinical interactions, communication strategies, and the importance of interdisciplinary care in supporting autistic individuals.

Learner Objectives for this Session:

- To discuss the different classes of medications used to treat co-occurring conditions inpatients with ASD including ADHD, Generalized Anxiety Disorder, Major Depressive Disorder, Intermittent Explosive Disorder and Post-Traumatic Stress Disorder.
- To discuss the potential benefits and risks of these medications.
- To illustrate principles of rational pharmacotherapy via use of clinical case studies.

Please Note: If you are unable to attend after registering, please contact us as soon as possible at (856) 382-6480.

Accreditation/Designation/Disclosure:

In support of improving patient care, The Cooper Health System is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

This activity was planned by and for the healthcare team, and learners will receive **2.0 Interprofessional Continuing Education (IPCE) credits** for learning and change.

The Cooper Health System designates this live activity for a maximum of **2.0 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

All faculty, planners, and others participating in continuing education activities sponsored by The Cooper Health System are expected to disclose all financial relationships.
